Executive Correspondence and Tasking for Federal Government

> Full support of structured and unstructured processes
> Document Management

> Records Management
> Mobile Support

Within the United States Federal Government, correspondence and task tracking and execution plays a huge role in how government agencies communicate and interact internally and with their constituents.

Agencies will have statutory requirements to manage and respond to this correspondence in a consistent and auditable manner.

For any organization, this can be a laborious process, but especially for a government serving over 324,000,000 people, with many moving parts. This backbreaking, multi-step process also costs the government a very significant amount of money and thus taxpayers a large amount.

ENTER APPIAN EXECUTIVE CORRESPONDENCE

Appian Executive Correspondence takes records management and automates it into an easy to use process that saves time, money, and cuts down on the frustration employees feel working with multiple systems to handle correspondence. Appian takes these multiple applications, and places them in an easy to use single source of truth.

Appian provides the most comprehensive solution available for enterprise correspondence management. Appian is a business process management (BPM) driven application platform that unites all data, processes, and collaborations in one environment, accessible on any mobile device through a simple social interface.

Considered the leading iBPMS vendor, Appian software is distinct from traditional BPM vendors in that it provides all of the following aspects:

- Appian Records
- Document Management
- Full support for both Structured, and Unstructured Processes
- Native Mobile Application
- Real-Time Reporting
- Scalable
