

PERFICIENT

# Our Partnership with Appian

Appian is an application development platform that delivers enterprise transformation. The platform infuses an industry-leading business process management (BPM) engine with modern enterprise technologies such as data management, mobility, and social collaboration for accelerated implementation of complex business operations. Appian is a unified platform for success comprised of:

BPM

Case Management

Platform as a Service

Native Mobility

Social Collaboration

The model-driven, low-code development platform is used to rapidly deliver applications into the hands of end users who can quickly begin to derive business value. Based on interviews with clients, Gartner states that Appian requires fewer consulting resources and less time to deploy than any other vendor.

## SOLUTION EXPERTISE

Perficient is the leading digital transformation consulting firm experienced in identifying and solving customer problems with BPM solutions. Our partnership with Appian supports solutions that enable you to easily build, use, change, and expand powerful enterprise applications to address critical business challenges.

## ADVISORY SERVICES

Our advisory services are a starting point to help execute enterprise-wide transformation initiatives and understand the business, ROI analysis, process discovery, and on-premises versus cloud decisions. Furthermore, we define and design the right projects for increased business advantage whether that means building new applications or retiring legacy system using Appian.

### **APPIAN USER EXPERIENCE DESIGN AND BUILD**

Our service accelerates delivery of intuitive user interfaces that facilitate the business decision lifecycle of awareness, knowledge, and action. This service is designed to build scalable applications on Appian that are unified with existing systems and include social collaboration and true enterprise mobility.

### **APPIAN ENHANCEMENTS**

This service offering is for enterprises looking to add more features or gain adoption to maximize their investment in an existing Appian application.

### **APPIAN PROJECT LAUNCH**

This service offering is a rapid time-boxed approach to launch a pilot or initial application for companies seeking to retire legacy systems or build BPM, case management, or unique enterprise solution applications. These solutions can be launched within weeks for immediate impact either in the cloud or on-premises.

### **APPIAN BPM AND INTEGRATION IMPLEMENTATION**

Our execution service is for organizations looking to build simple, powerful business processes on the modern BPM platform that includes integration to existing data, enterprise systems, and service-oriented services. This is based on our agile, flexible, and adaptive Enable methodology for client engagements enhanced specifically for Appian projects.

Our partnership with Appian supports solutions that enable you to easily build, use, change, and expand powerful enterprise applications to address critical business challenges.
