CASE STUDY

Appian

MICROSOFT AZURE ISV:

Appian

WEB SITE: www.appian.com

LOCATION: Reston, VA, USA

ORG SIZE: More than 800 employees

MICROSOFT AZURE ISV PROFILE:

Appian is a recognized leader in low code, BPM, and case management. Its single platform allows organizations to quickly create custom applications, tying different parts of the business together to fully support digital transformation. Financial, healthcare, and governmental organizations turn to Appian every day to help them streamline business processes and create powerful custom applications.

Microsoft Azure Platform Facilitates Deployment of Easy Low Code Business Process Management

“As a leader in low code business process management, our clients selected us because building custom applications is intuitive and easy in our platform. Those same reasons led them to select Azure as their preferred IaaS solution, making Appian on Azure a natural choice.” – Malcolm Ross, VP of Product, Appian

• SITUATION

Appian’s customers include Fortune 500 enterprises and governmental institutions where security, compliance and reliability are major concerns for their solutions built on the Appian platform. Further, these customers often count Microsoft as a key strategic partner. Appian wanted a partner that could support users across the globe while deploying on their choice of cloud Infrastructure-as-a-Service architecture.

• SOLUTION

Microsoft Azure IaaS provides an ideal platform for Appian’s enterprise customers to rapidly deploy their own private cloud to operate Appian. Azure storage, virtual networks and cloud servers allow Appian’s customers to support a deployment in over 35 different geographic regions with a highly reliable and secure architecture. Additionally, Azure’s support for over 50 different compliance frameworks provides the high level of assurance Appian’s most cautious financial sector and governmental clients need.

• BENEFITS

Microsoft Azure makes it possible for Appian customers to deploy in three easy steps.

Azure IaaS gives Appian customers peace of mind with its high global availability, storage and security.
