Appian

Regulatory and Statutory Compliance

> Fast, simple access to the complete, contextual picture speeds outcomes

> Document and Content Management

> Appian Records converge case information in a single location

> Full Audit Traceability of Every Process

Policies, procedures, regulations, directives, laws, and executive orders...A long list, but they all have one thing in common—they require the government to take an action. Compliance with these above listed directives can be extremely burdensome with no options for shortcuts. This oftentimes includes producing mountains of documents and evidence in order to satisfy an agency's statutory requirements for Congress. As with any government program or mission, transparency with stakeholders is of critical importance.

The reach of these compliance activities extends well beyond what the government is required to do. Private companies, citizens, and foreign entities often have frequent touch points with the government. Providing the level of transparency required for all stakeholders can be extraordinarily burdensome. As regulations get ever more complex, how can agencies perform their missions at a reasonable cost, but at the same time with increased efficiency?

ENTER THE APPIAN PLATFORM FOR REGULATORY AND STATUTORY COMPLIANCE

With Appian, all data gathered during the regulatory process is stored within the application and easily accessible by our Records feature. Records allows agencies to integrate data from multiple data sources, collect attachments, and store audit history while performing any task. Utilizing the data in Records, government agencies can take advantage of Appian's business roles and workflow features to make sure all stakeholders perform their actions in a consistent manner. Appian provides transparency into the various processes that can be shared internally and externally as required, providing real-time status to all stakeholders.

Appian provides the most flexible solution available for meeting the needs of government regulators. Appian is a business process management (BPM) driven application platform that unites all data, processes,

and collaborations in one environment, accessible on any mobile device through a simple social interface. This solution allows agencies to combine data from multiple systems, data sources, and workflows into a single view of the process. For agencies that perform field inspections, Appian's mobile capabilities allow inspectors and auditors the same functionality available to desktop users.

Considered the leading Dynamic Case Management vendor, Appian software is distinct from traditional Case Management vendors in that it provides all of the following aspects:

- Appian Records
- Document Management
- Full support for both Structured, and Unstructured Processes
- Native Mobile Application
- Real-Time Reporting
- Scalable
- Secure Cloud solution capable of storing sensitive PII data

APPIAN FOR FEDERAL AND DOD

Appian delivers a platform for Federal and DoD Regulatory and Statutory Compliance that unifies powerful capabilities:

Business Process Management: Recognized as the leading platform for BPM.

Dynamic Processes: Handle dynamic and ad hoc tasking required to ensure compliance.

Complete information: Unify all information on any topic and view it in a single, drillable report.

Business Rules: Create and manage business rules to quickly adapt to evolving regulations.

Collaboration: Take advantage of your worker's brain power with social collaboration that helps complete work faster.

Native mobility: Launch on any device so action may be taken anytime, anywhere.

Low-code: Use drag-and-drop, point-and-click design to launch applications, fast.

FOCUS ON IMPACT
- Automate core processes
- Unify all data
- Get instant analytics
- Become mobile
- Build powerful applications
- Adapt to continual change
- Adhere to regulations

FOCUS ON CAPABILITIES
- Point and Click Application Design
- Agile Delivery
- Native Mobility
- Business Process Management
- Document Management
- Dynamic Business Rules
- Complex Approval Routing
- Role-based Security
- Real-time Reporting

FOCUS ON REGULATORY AND STATUTORY COMPLIANCE
- Centralize information into one complete record of the process
- Integrate with legacy systems and databases to provide data to inform process
- Provide audit traceability for every action
- Go Cloud First with Appian's FISMA Moderate cloud offering
- Store Content from multiple sources in one easy to access interface

Appian

Appian provides a leading low-code software development platform that enables organizations to rapidly develop powerful and unique applications. The applications created on Appian's platform help companies drive digital transformation and competitive differentiation.
