

Appian for Public Sector

CONSTITUENT CASE MANAGEMENT

- > Fast, simple access to the complete, contextual picture speeds outcomes
- > Mobile solutions allow constituents to interact with government on their devices
- > Appian Records converge case information in a single unified view
- > Contact Center integration assures effective end-to-end support

In today’s landscape, delivering high value services tends to be an extended interaction. Government agencies are being asked to manage complex business processes and deliver the right outcome on the first constituent touchpoint, and on every subsequent touchpoint.

This demand for agency efficiency, that continues to keep pace with the communications that constituents expect, requires a highly agile, flexible, secure, and on-demand platform to respond to specific needs.

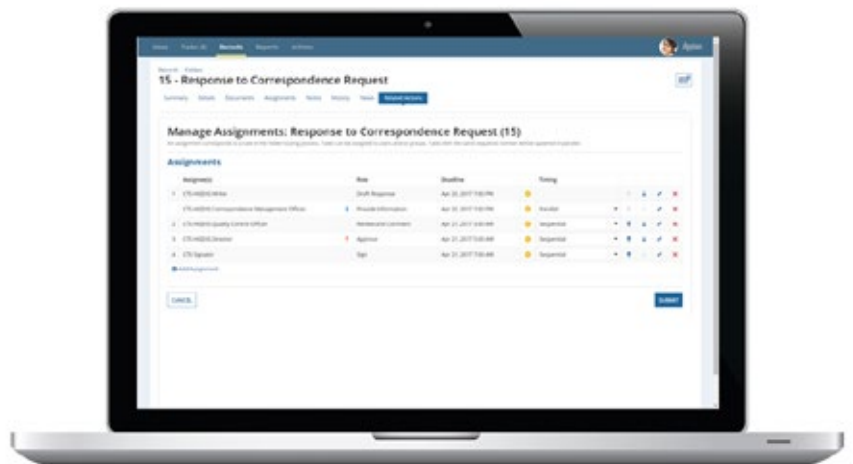

As government IT reinvents itself, an enterprise constituent case management solution will play a powerful role in establishing more interactive and productive relationships with the public. Is your organization ready?

MEET THE CHALLENGE

The first step to effective constituent case management is having the right technology in place.

With Appian, agencies gain:

- Single, unified view of interactions from multiple data sources
- Full support for both structured, and unstructured processes
- Increased accuracy through audit history tracking
- Reduced response times for constituent interactions
- Structured work streams for quality and compliance

Constituent Case Management

FOCUS

Appian provides the capabilities that agencies need to deliver constituent case management services on time and on budget.

- Centralize Constituent Interactions
- Integrate with Contact Center Solutions
- Provide Audit Traceability
- FISMA Moderate Certification
