PROTECTING YOUR WORKFORCE
Organizations like yours spent much of 2020 dealing with the COVID-19 pandemic. Now, as more employees return to onsite work, companies are figuring out how to respond to positive coronavirus cases when they occur. To reopen and stay open safely, you have to be prepared to respond to any scenario with a secure, unified response hub that can easily track and respond to incidents.

A PHASED APPROACH FOR YOUR WORKFORCE
Appian Workforce Safety is the only solution with a unified, automated, and flexible approach for safely returning to onsite work. The unified response hub gives you real-time access to track employee health, monitor incidents across facilities, automate return-to-work authorizations, and comply with company policies and government regulations. The solution can be deployed within hours, with minimal disruption, on the HIPAA-compliant and HITRUST-certified Appian Cloud, or as a self-managed solution.

Appian Workforce Safety includes a daily pass request process with screening for each individual who needs to be on site and an automated return-to-workplace certification available on their mobile device.

Through real-time reporting on facilities and capacity management, you are able to track the number of individuals who request access to certain worksites, offices, and locations, in accordance with local government guidelines. This feature, coupled with Appian’s industry-leading case management capabilities, helps you respond quickly to positive cases and support your entire workforce during the COVID-19 pandemic and beyond.

This solution is available in English, Italian, Spanish, German, and French, with the ability to expand to other languages for your diverse workforce.

INDUSTRY LEADERS TRUST APPIAN
A leading American technology company chose Appian to manage its response to the COVID-19 pandemic and the eventual return of their workforce to their offices and facilities. Their solution is HIPAA compliant, configurable for any health crisis and centralizes all employee data on health status, recent travel, and recent symptoms and diagnosis. The company’s Crisis Management team will use this solution to respond to incidents and coordinate the safe return of thousands of employees when it opens its facilities. The leading company will use Appian to support their top priority — which is the health of its global workforce and facilities worldwide.
Workforce Safety

FAST, EASY, AND SECURE

- **A unified response hub.** View and manage workforce health and work status in real-time, through a single interface
- **User-friendly workforce screening.** Provide employees, visitors, contractors, and anyone else onsite with a simple web or mobile interface for submitting and updating the personal health and risk data required by local law and corporate policy
- **Quick response.** Easily track and respond to exposures and incidents with contact tracing and case management in accordance with the U.S. Centers for Disease Control and Prevention advisements
- **Simple integrations.** Easily leverage the mobile badging permissions with the systems you already have in place via faster integrations
- **Intelligent return-to-workplace certification.** Evaluate workforce health and risk data and authorize return to work with an expanding library of pre-loaded rules based on health organization guidelines and government regulations
- **Automated support for a phased approach.** Deliver onsite passes based on various factors, including: geography, team, role, personal health risk, and workspace capacity
- **Fast issue resolution.** Quickly manage exceptions, appeals, and employee concerns with built-in case management capabilities
- **Privacy and security.** Protect sensitive health information with a solution that can run on the Appian HIPAA-compliant and HITRUST-certified cloud
- **FDA-authorized COVID-19 testing.** Appian has partnered with digital health company Everlywell and their at-home collection tests
- **Capacity management.** Streamline scheduling with easily defined capacity limits
- **Facility reporting.** Easy to read, real-time reporting dashboards by facility to see which locations are controlling spread or which need extra attention
